Overview

Southeast Georgia Health System is a not-for-profit healthcare system with multiple locations and services and has served the residents and visitors of Southeast Georgia since 1888. Headquartered in the historic port city of Brunswick, the Health System serves the healthcare needs of residents from eight counties - Brantley, Camden, Charlton, Glynn, Long, McIntosh, Pierce, and Wayne.

The Challenge

Southeast Georgia Health System needed a reliable, flexible desktop solution giving them the ability to install small applications on the thin clients. They also needed to clone devices quickly and efficiently. Another primary requirement was a secure, cost effective solution that was easy to manage remotely.

The Solution – CLI

Southeast Georgia Health System evaluated a number of thin client solutions. With the assistance of Strategic Systems USA, a CLI PlatinumPLUS Partner, SGHS selected the Computer Lab International MT3500X thin client. "The CLI MT3500x gave us everything we wanted - small form factor plus zero footprint by mounting the device on the back of LCD monitors. The out of box reliability and performance was excellent. CLI technical support was very helpful from the beginning. They assisted us in loading the management software and in building our base image."

CLI thin client devices were deployed in many areas of the hospital including nursing stations, laboratories and clerical areas. The ability to access their Cerner Millennium software, as well as Office and Web applications securely and reliably, substantiated to the health organization that Computer Lab International offered the best solution.

The Results

Southeast Georgia Health System is extremely pleased with the CLI product. The decision has saved them time and money. The CLI solution is technically superior since the units come pre-loaded with a custom XPe image, leaving minimal steps for setup and deployment. The administration software is extremely intuitive making it simple to manage hundreds of devices throughout the network.
